## **PRESCRIPTION DRUG MONITORING PROGRAM: ADMINISTRATION**

*July 2016*

### **Codebook**

This codebook describes the variables in a dataset that examine variation in state laws regarding the administration of prescription drug monitoring programs. This dataset is longitudinal and is updated through July 1, 2016. The jurisdictions selected for measurements are the 50 states and the District of Columbia.

There are six standard variables in every PDAPS dataset. They are:

#### **ID:**

An identification code generated by the MonQcle.

#### **FIPS CODE:**

The Federal Information Processing Standard (FIPS) codes are a standardized set of numeric codes issued by the National Institute of Standards and Technology to ensure uniform identification of geographic entities through all federal government agencies.

#### **JURISDICTION:**

This is a dropdown selection in each coding form. It includes the jurisdictions coded in the dataset.

#### **EFFECTIVE DATE:**

This date (MM/DD/YYYY) is the most recent effective date of the legal text captured for this place. The effective date represents the date the policy coded was put into effect.

#### **VALID THROUGH DATE:**

This date (MM/DD/YYYY) is the last date the policy was in effect as reflected by the legal text captured to code this policy.

#### **LEGAL TEXT:**

This is a text box that captures all legal text relevant to the coding questions. This will not download into Microsoft Excel.
